Cold Plunge & Sauna Development

Wooden cold plunge tubs, outdoor saunas and chiller integration for global wellness brands, distributors and commercial projects.

homewellspa.com sean@homewellspa.com Dongguan · China

WHO WE ARE

Wellness products, built with purpose.

HOMEWELL SPA is the wellness-focused brand of Homewell Home (Dongguan) Co., Ltd., established in 2021 in Dongguan, China. We develop cold plunge tubs and sauna products for overseas B2B partners — through design collaboration, wood manufacturing, qualified component sourcing, integration, assembly and testing.

01

Wood manufacturing

Wood processing, surface finishing and trial assembly support the development of wellness products.

02

Component integration

Electrical, heating, chilling, hardware and glass components are sourced from qualified suppliers and integrated.

03

Assembly and testing

Assembly and testing sit inside the manufacturing workflow, with records provided per model.

BRAND PHILOSOPHY

Crafted warmth

Sauna formats rooted in wood craftsmanship and contemporary wellness spaces.

Thoughtful cold

Cold plunge formats designed for product collections and evolving wellness environments.

Built together

Collaborative OEM/ODM development that supports your product roadmap.

> We do not claim to manufacture electrical, heating, chilling, hardware or glass components in-house. Component certificates are not equivalent to finished-product certification; market-specific compliance is confirmed separately for each project and target market.

COLLECTION 01

Cold Plunge Systems

Upright and laydown formats for wellness collections, private-label projects and product development.

Upright Wooden Cold Plunge Tub

A compact upright format for wellness collections, private-label projects and product development.

FORMAT	Upright round, compact footprint
EXTERIOR	Wood, finish agreed per project
LINER	Stainless steel (shared-factory reference)
CHILLER	External unit, integrated per project
BRANDING	Logo, finish and packaging options
DIMENSIONS	Confirmed per model

Laydown Wooden Cold Plunge Tub

A laydown format for brands exploring outdoor and wellness product ranges.

FORMAT	Rectangular laydown
EXTERIOR	Wood, finish agreed per project
LINER	Stainless steel (shared-factory reference)
CHILLER	External unit, integrated per project
BRANDING	Brand presentation and packaging
DIMENSIONS	Confirmed per model

CUSTOMISATION

Finish and branding

Exterior finish, logo treatment and brand presentation are agreed before production.

Chiller pairing

Integration reviewed against your market, electrical supply and tub format.

Packaging and market

Packaging, labelling and documentation aligned with your target market.

> Detailed dimensions, electrical ratings, component specifications and compliance are subject to model-specific verification.

COLLECTION 02

Outdoor Sauna Collection

Barrel and square formats, with wood, glazing and interior options discussed for each project.

Barrel Sauna

A recognisable barrel format for wellness-focused product portfolios.

BUILD

Barrel-shaped wood

WOOD

Red cedar or thermally modified spruce

HEATER

Per market and model

Compact Square Sauna

A space-conscious square format for product-line development.

BUILD

Compact square

WOOD

Red cedar or thermally modified spruce

INSTALL

Reviewed per project

Large Square Sauna

A larger square format for wellness collections and project conversations.

BUILD

Square architectural profile

WOOD

Red cedar or thermally modified spruce

INTERIOR

Finish and layout per project

DESIGN DETAILS

Wood selection

Red cedar for natural colour and durability; thermally modified spruce for stability in changing climates.

Glazing

Glass front and side options discussed against the format, siting and target retail price.

Interior layout

Bench configuration and interior finish agreed per project and per market.

> Sauna heater integration is reviewed against the requirements of your target market and the selected model. Electrical and installation requirements are confirmed per project.

INTEGRATION & QUALITY

Chiller Integration

Chillers are supplied units, selected and integrated per project. Model selection depends on your tub, electrical supply and target market.

How we review integration

01 Share target market, electrical requirements and tub format

02 Review filtration needs and expected application

03 Confirm the applicable supplier model and documentation

Documentation

Intertek Authorization to Mark, control no. 5029677 (report 240400096SHA-001), lists QG-10-RB, QG-0.5HP-110V, QG-RA-12 and QG-RA-15. Scope is limited to the listed chiller models.

DOCUMENTED SUPPLIER TEST

QG-035-D supplier test (220 V, 50 Hz, R32): 250 L of water cooled from 35°C to 3.5°C in 3 hours and 7 minutes. This is a single documented test under the recorded conditions.

QUALITY & TESTING

Controlled specifications, verifiable records.

01

Specifications

Materials, electrical requirements and component selections are reviewed for the target configuration.

02

Inspection evidence

Photos, records and relevant component documentation are available for the product under discussion.

03

Compliance clarity

CE and ETL documentation is available for selected sauna heaters and components. Ask for what applies to your model and market.

Dimensional inspection

Packing workshop

TRACK RECORD

Delivered across the US, Germany and the UK.

Formats shipped between 2023 and 2024. Volumes are cumulative across projects, not a single order.

FORMAT	DIMENSIONS	DELIVERED 2023–2024
Barrel sauna	2.1 × 2.1 × 2.4 m	500 units
Curved sauna	2000 × 2000 × 2000 mm	300 units
Single-person cold plunge	Ø960 mm × H1030 mm	1,000 units
Two-person oval cold plunge	157 × 107 × 71 cm	300 units

Markets served: United States, Germany, United Kingdom. Dimensions shown are the formats delivered; current production follows the configuration agreed for each project.

HOW WE WORK

01

Share your brief

Target market, format, application and customisation objectives.

02

Review configurations

Materials, components, branding and technical feasibility.

03

Evaluate prototypes

Samples, documentation and testing scope before production.

04

Prepare for production

Approved specifications, quality checks, packaging and shipping.
